Custom LED Lighting Built for You

Proudly Canadian

Our custom lighting is assembled right here in Canada, using Canadian-made aluminum. Quality you can feel good about.

Save Time

We custom cut and assemble lighting to exact specs, saving time and avoiding on-site adjustments.

Fast Delivery

Get fully built, ready-to-install lighting in 1 week to keep your projects on schedule.

Precision Built

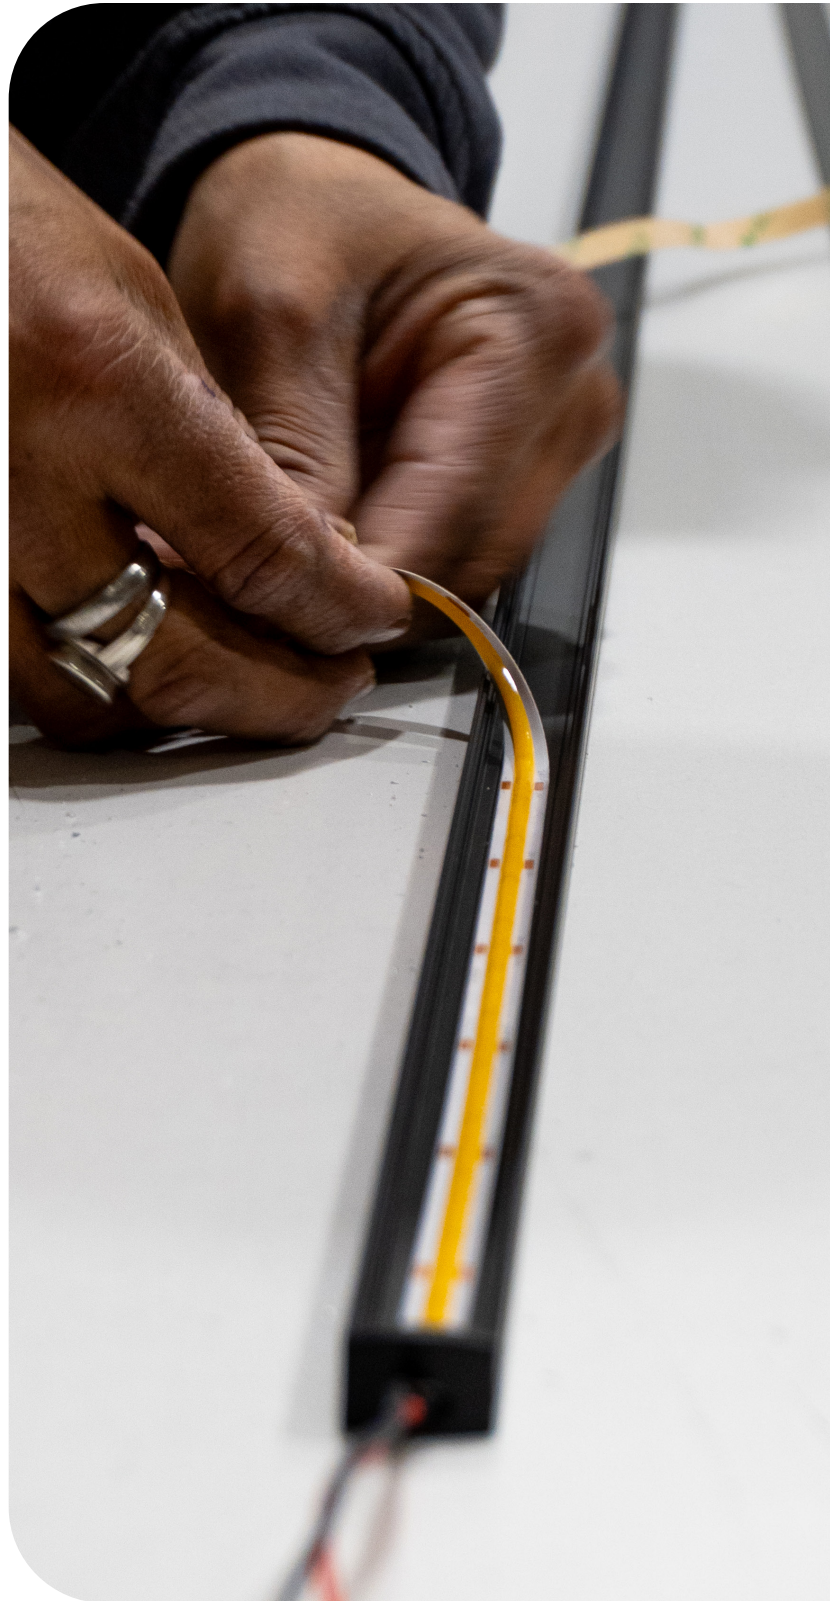

Each order is measured, assembled, and tested in-house for a flawless fit and finish.

Clean Look. Smart Choice.

Customers love the sleek look, energy savings and custom fit.

Our LED Tape Lights

Available by the roll or custom cut to your exact dimensions, our LED tape light lineup covers every application from simple residential installs to fully built-out custom lighting projects.

COB LED Tape Lights

A high-density chip-on-board tape light that produces smooth, dotless linear illumination with a CRI of 90+, making it an ideal choice for applications where light quality and uniformity matter most.

Colour Options
2700K | 3000K | 4000K

IP20

Ordering Code	Input Voltage	Lumen/ft	Colour Temperature	Rated Power	Power/ft	Min. Cut Distance	Width	Maximum Length
TLC-3W-24V-27K-I	24Vdc	240lm	2700K	48W/16ft	3W/ft	2"	8mm	32ft
TLC-3W-24V-30K-I	24Vdc	300lm	3000K					
TLC-3W-24V-40K-I	24Vdc	270lm	4000K					

Dry Location LED Tape Lights

A versatile indoor tape light available in two LED series, offering a range of power and lumen outputs to suit everything from subtle accent lighting to brighter task and general illumination applications.

Colour Options
3000K | 4000K

IP20

Ordering Code	Input Voltage	Lumen/ft	Colour Temperature	Rated Power	Power/ft	Min. Cut Distance	Width	Series	Maximum Length

FT-05W-RGB	24Vdc	160lm/ft	RGB			15mm	

Driverless 120V LED Tape Light

The only tape light in the lineup that connects directly to standard 120V AC power, eliminating the need for a separate driver or transformer. A straightforward solution for installations where simplicity and long runs are the priority.

Colour Options
3000K | 4000K

IP65

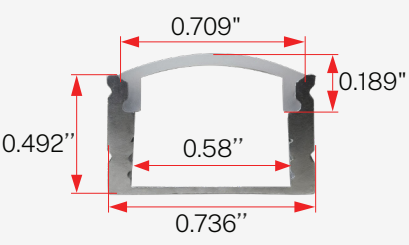

Ordering Code	Power/ft	Lumen/ft	Min. Cut Distance	Width	Maximum Length	Colour Temperature
TLS-3W-120V-30K-WP	3W/ft	200lm/ft	9-13/16" (25cm)	12mm	150ft	3000K
TLS-3W-120V-40K-WP	3W/ft	200lm/ft	9-13/16" (25cm)			4000K

Square

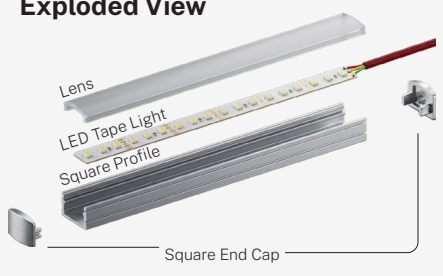

A sleek square aluminum profile purpose-built for LED tape light installations, the square profile delivers a clean, contemporary finish suited to surface mount applications. Its compact form factor makes it equally at home in residential cove lighting, under-cabinet accents, and architectural detail work, bringing a polished, professional look to any space.

Black Square

The black square Profile channel brings the same clean, low-profile form of the standard square Profile to spaces that call for a bolder, darker aesthetic.

Suited to both surface mount and recessed installations, it pairs seamlessly with LED tape lights in residential, commercial, and architectural settings where contrast and visual impact matter.

Slim Square

The slimmest option in the square Profile lineup, this aluminum channel is purpose-built for compact LED tape light installations where a minimal footprint is essential.

Its clean square profile integrates discreetly into tight spaces, making it an ideal choice for custom residential lighting applications where the hardware should disappear into the design.

Wide Square

A wider take on the classic square Profile profile, this aluminum channel offers enhanced support for LED tape light installations where a broader, more substantial housing is desired. Its clean square form translates well across residential, commercial, and architectural applications, adding a refined, modern presence to any lighting project.

Recessed

Skip the head-scratching.

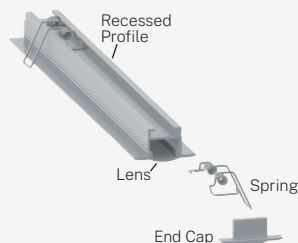

We measure, cut, and assemble your runs so you just install.
arani.ca/custom-lighting

An aluminum Profile channel engineered for fully recessed LED tape light installations, where the goal is a flush, built-in appearance with no visible hardware.

Its compact profile sits cleanly within a surface to create a seamless linear light effect, ideal for residential cove, millwork, and architectural detail applications where the fixture disappears entirely into the design.

LunoLite Recessed

A complete, ready-to-install recessed Profile kit built for LED tape light applications where a flush, fully integrated look is the goal.

Designed to sit flush within a surface, it delivers a clean, seamless lighting effect that disappears into the architecture, making it an ideal choice for high-end residential and architectural installations.

V-Shape

A surface-mount aluminum Profile channel with a distinctive V-shaped profile, designed to direct LED tape light output at an angle for soft, indirect illumination.

Its geometry makes it particularly well suited to accent lighting, cove applications, and any residential setting where a subtle, diffused glow is the goal.
