

Designed by Steven Sabados of S&C, this striking LED linear island chandelier is a featured piece from the Terra Collection. The fixture is defined by its architectural black frame, which supports a horizontal row of seven elegant columns of varying heights for a dynamic visual effect. Each column is topped with sophisticated clear glassware that houses the integrated LED light source, providing a clean and modern glow across your dining area or kitchen island. For added versatility, this model is 3CCT enabled, allowing you to customize the color temperature to perfectly complement your interior's ambiance. Great for a rectangular dining room or kitchen table
