

Designed by Steven Sabados of S&C, this striking LED chandelier is a featured piece from the Terra Collection. The fixture is defined by its architectural black frame, which supports nine elegant columns of varying heights for a dynamic visual effect. Each column is topped with sophisticated clear glassware that houses the integrated LED light source, providing a clean and modern glow. For added versatility, this model is 3CCT enabled, allowing you to customize the color temperature to perfectly complement your interior's ambiance. Great for a dining room or kitchen table.
