

INSTALLATION INSTRUCTIONS  
GRID FRAME LIGHT-EMERGENCY  
BATTERY KIT: GFL-EMKIT

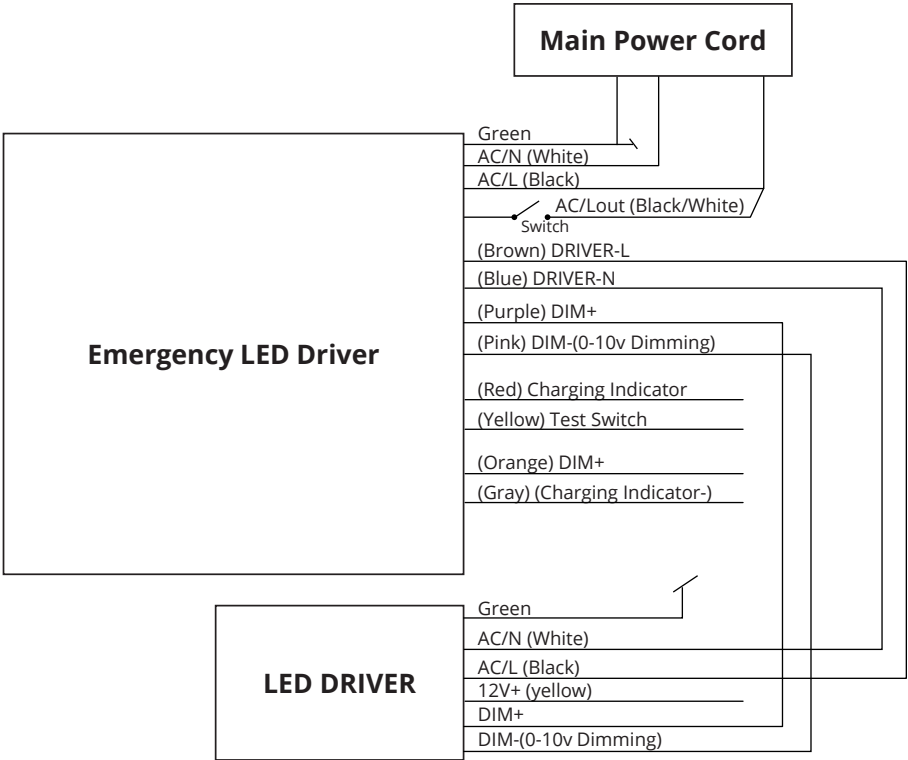

OVERVIEW

**PARTS LIST:**

1: Screws (TB4.0\*4.5)  
2: Screws (M3\*MM)  
3: Grommet  
4: Wire Connectors  
5: GFL DRIVER (sold separately)  
6: Emergency battery (sold separately)  
7: Mounting plate for EM driver and LED driver  
8: Junction box  
9: Junction box plate

| PARTS LIST    |                                             |          |
|---------------|---------------------------------------------|----------|
| Serial Number | Name                                        | Quantity |
| 1             | Screw (TB4.0*4.5)                           | 6        |
| 2             | Screw(M3*MM)                                | 5        |
| 3             | Grommet                                     | 1        |
| 4             | Wire Connectors                             | 5        |
| 5             | GFL DRIVER (sold separately)                | 0        |
| 6             | Emergency battery (sold separately)         | 0        |
| 7             | Mounting plate for EM driver and LED driver | 1        |
| 8             | Junction box                                | 1        |
| 9             | Junction box plate                          | 1        |

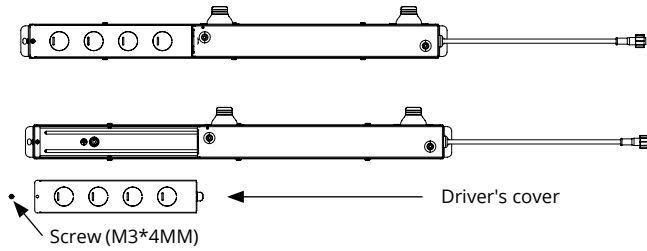

WIRING DIAGRAM

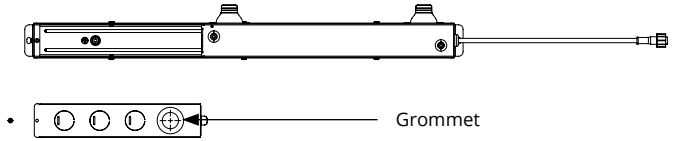

# INSTALLATION

**Installation must be carried out by a qualified electrician.**

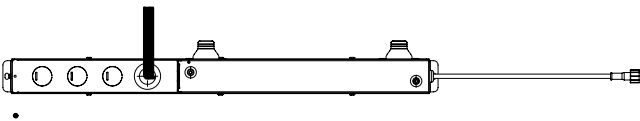

**1** Remove the the driver's cover.

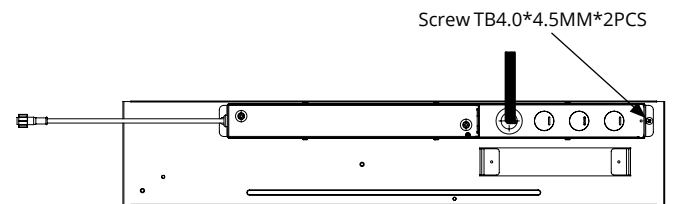

**2** Install the grommet.

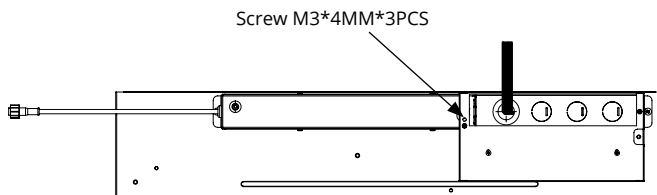

**3** Reattach the cover and thread the cables through the grommet. Do not tighten the screws at this stage.

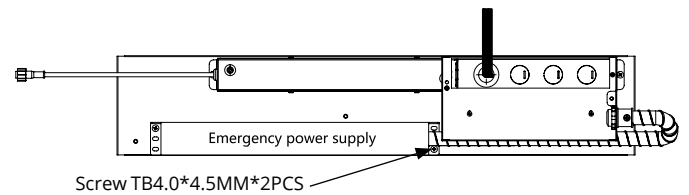

**4** Mount the driver onto the emergency bracket.

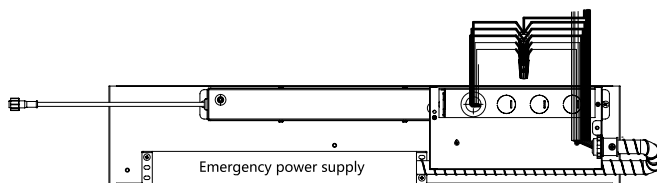

**5** Install the junction box.

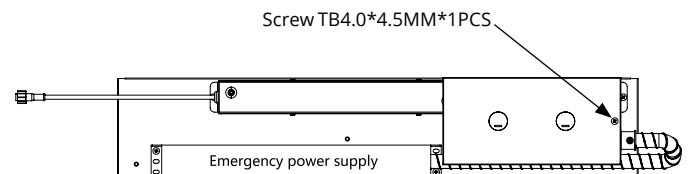

**6** Install the emergency battery.

**7** Make all wiring connections.

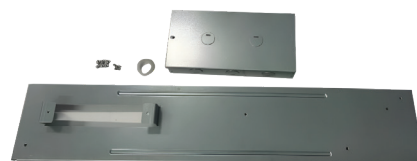

**8** Install the junction box cover.
