

Ceiling LED Pendants

FM12945
INSTALLATION SHEET

START FROM HERE

- Make sure power is completely off at the fuse box.
- Have your fixture installed by a qualified licensed electrician
- Prepare everything in a clear area.
- Wear gloves at all times during this installation.
- Read instructions carefully before you start assembly.
- Keep this instruction sheet for future reference.

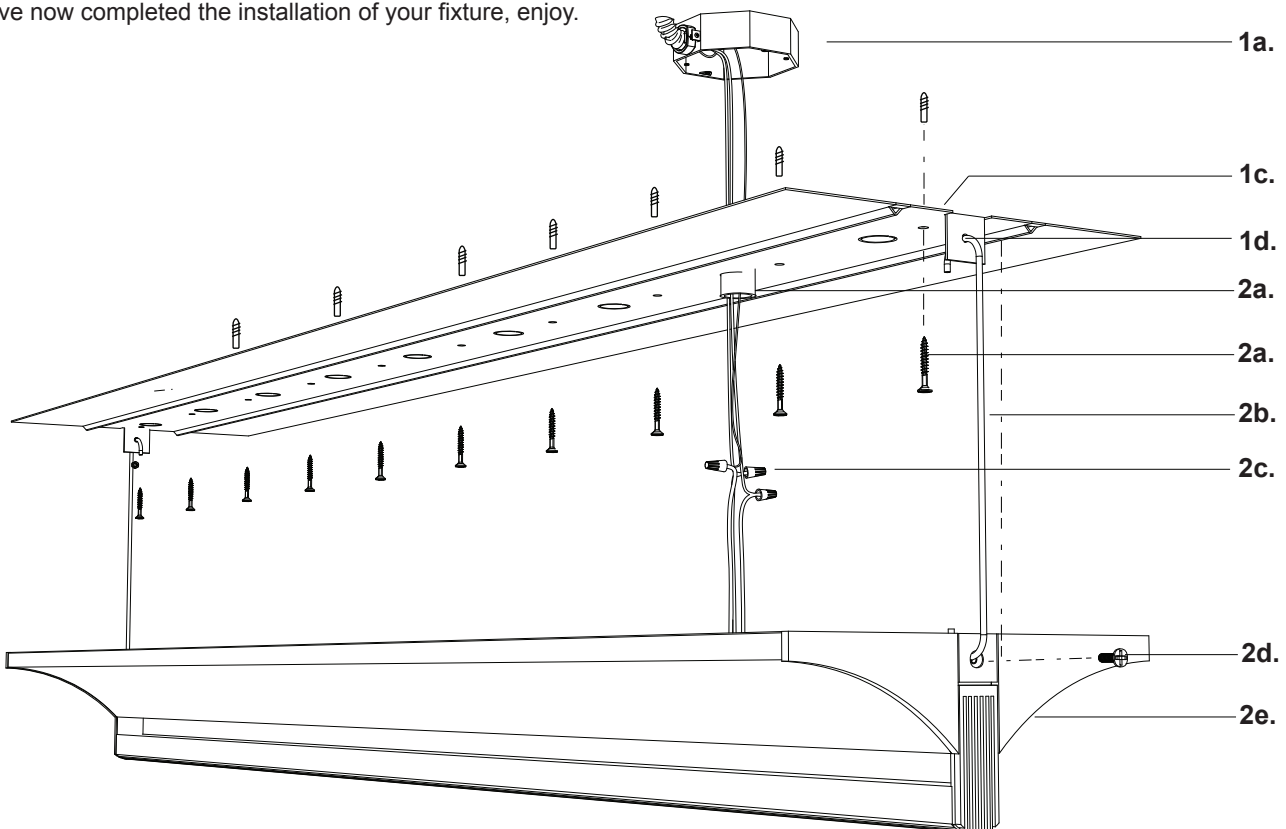

Technical Support: 1-877-452-6858

Please Note:

- All Kuzco LED fixtures come with pre-wired LED module(s).
- Unless instructed to do so, please do not touch any part of the LED module(s) as any unnecessary contact with the module could cause permanent damage.
- For dimming, an ELV (Electronic Low Voltage) type of dimmer is required.

CAUTION: HEAVEY FIXTURE, THE JUNCTION BOX NEEDS TO BE REINFORCED BEFORE INSTALLATION.

- 1.** Remove the fixture from it's original packaging. Remove the canopy mounting plate (**1c**) from within the fixture (**2e**) by removing screw (**2d**). Align and remove the knockout on the mounting plate to the junction box. Set a bushing (**2a**) through this knockout. Secure the mount plate (**1c**) to the junction box (**1a**) and ceiling using screws and plastic anchors (**2a**) provided.
- 2.** Next, using the two supporting hooks (**2b**) connect these to the end tabs (**1d**). Lift the fixture (**2e**) up to the mounting plate and hook. Connect all wires (**2c**) correctly, black to black "L", white to white "N" and the ground to ground with the provided marrets from the hardware package. Now remove one hook and thread screw (**2d**) to the tab (**1d**). Repeat this step to the opposing end.
- 3.** You have now completed the installation of your fixture, enjoy.
